? About the Worlds

/rtp

There are many worlds in Mineseed

When you first join the server, you'll be in our /spawn.

Spawn has a lot of NPCs that you can talk to and learn more about the server.

We have 5 different worlds in which you can claim land to build:

- 1.19 world (called world)
- 1.20 world (called 120World)
- 1.20 world (called survival)
- 1.21.4 world (called survival2)
- 1.21.11 world (called survival3)-- get there by doing /rtp or /wild in-game

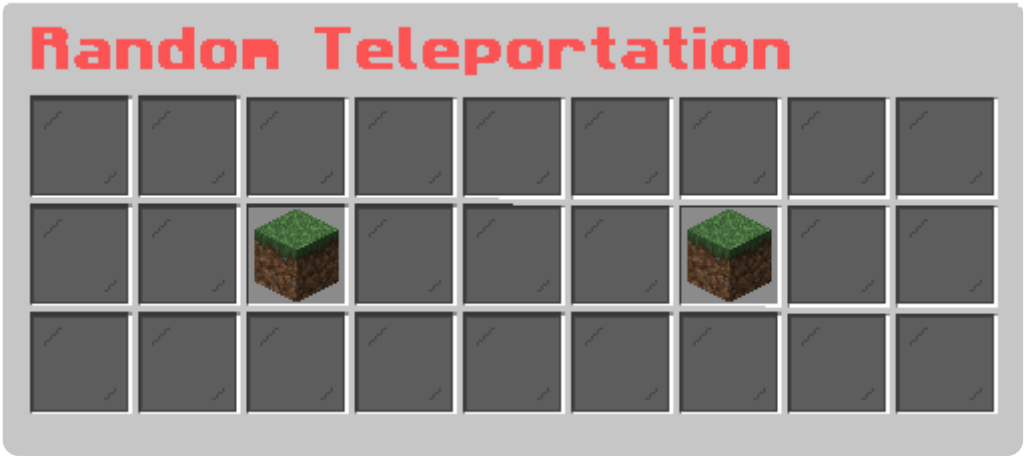

We have 3 worlds that you cannot claim land, but can use to gather resources and materials:

- resource world (called resource_world):: resets once a week -- get there by doing /rw tp in-game
- nether (called nether) :: resets every other week — get there by doing /rw tp nether in-game
- end (called end) :: resets every four to eight weeks

RTP to a specific biome

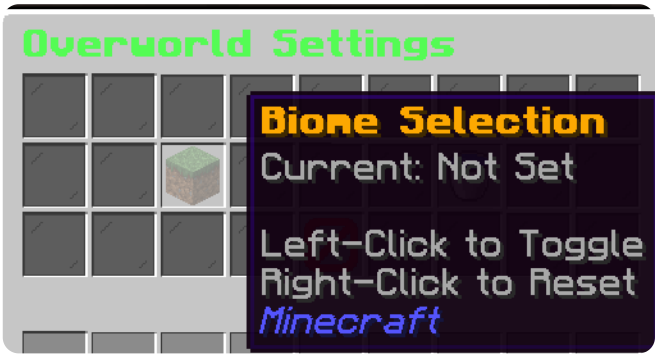

With some ranks, you can specify specific biomes to go to in the survival world or in the resource world. To use this, ensure you have either warlock or dragon rank and do /rtp.

Doing /rtp will open this window:

The left grass block will allow you to select a biome setting in the survival world:

Biome Selection	Water Selection
	
Once you are in the selected /rtp menu, left click on the grass block and go through the menu to pick which biome you'd like to go to. You can clear a previously selected biome by right clicking on the block.	You can also decide whether you do or do not want to teleport into water. This is helpful if you're looking for a water biome, or a biome that may have a lot of water in it.

Once you have made your selection, click the red ?to go back and click the overworld grass block to teleport!

These same instructions can be followed with the right button in the main /rtp window to select a biome in the resource world (only with Dragon rank). If that biome does nto exist in

the resource world, then it will say that it cannot teleport you.

If you're on bedrock or you prefer to type full commands, try

- /rtp teleport survival NAME_OF_BIOME
- /rtp teleport resource_world NAME_OF_BIOME

> Pro tip: see how much time is left before the resource world resets in your scoreboard!
>
> The resource world is the only world that will naturally spawn phantoms
