Auction House

/auctionhouse | /ah

The auction house or /ah, is a place to list items for sale and purchase items that others have listed.

The auction is a great way to make money by selling items that other players may be interested in buying. Typically, players will sell hard-to-get, rare, or extra cheap items on /ah and prefer to use chest shops to sell everyday/common items.

Each item is listed as an auction so players can purchase it right away with a set price, or, if the seller has opted, to bid for an item. Any unsold items after the auction house's time duration is returned to your collection bin.

Everything except the bottom row of this image shows items for sale in the auction. To purchase, simply hover over the item to read about the statistics:

In this example, it shows what is on sale with the details of the lore. It shows who the seller is, what the price is, and when the item expires.

How to Sell

To list an item on the auction house, just hold the item in your active hand and type the following command:

/ah sell

Please note that for pyrofishing items and seasonal crate items, the price must be equal to or more than the minimums set in the Official Pricing Guide.

> Mineseed's Senior Staff reserve the right to remove and return an item to a player or delete the item if it is inappropriate, if a player is using /ah to advertise something, at a price that is deemed to be scamming, or because it infringes on the /rules. If a player continuously repeats behavior, they may lose /ah abilities.

How to Cancel a Listed Item

Click on the ender chest in the bottom left hand corner of the /ah menu. Click on the item that you'd like to cancel. It will automatically remove it and put it into your inventory, so make sure you have at least 1 spot open before canceling something!

Other Notes and Commands

In the bottom of the /ah menu are some options for things. To see an archive of everyone's transactions from the auction house, visit the Mineseed discord and check out the #auction-house channel.

Please note: if you do not manually remove your items from your /ah ender chest, it will automatically get deleted 2 days after your auction ends!

Symbol	Description
Ender Chest	Your Auctions: click this to view all the items you are currently selling on the auction. This will give you a summary on how many items you have for sale.
Glowstone Dust	Filter Options: this will let you change how to view items in the auction house
Sunflower	Refresh the page: click to refresh the listings; the auction house is very popular and updates constantly!
Arrow	Next page/Previous page: use this to see other items on sale if there are more than 45 items listed in the auction house
Book	Guide: the same information this page, but shorter ?
