? Economy

There are many ways to make money in Mineseed. Money is tracked in your scoreboard. You can see your exact balance by doing /balance. Some other helpful commands are further down this page.

To earn money, you can check out the /shop, which will show you what things sell for. Collect whatever you want to sell, and you can do /sg (or /sell gui) and put everything in the window. By closing it, you'll see your bank account on the right side of your screen increase. Most people make carrot or potato farms. With a fortune tool and maxed out mcmmo herbology, carrots and potatoes can drop up to 11 per plant, and sell for $3.00 per crop. It adds up quickly!

You can spend money in player shops (check /warps) or in the auction house (/ah). Players will list various things, usually special or rare items, and you can either bid for them or buy them. If you'd like to open your own shop, ensure that your prices are at or above the prices listed in the Official Pricing Guide.

People also like to earn money by /fishing. Learn more about /fishing by visiting /warp how2fish or /kit fishing. There is a fishing tournament every 2 hours at /warp fishing. 1st place wins $8K, 2nd gets $5K, and 3rd gets $2K. You can sell your fish at /fish shop. There's also a pier at spawn you can fish at, you can get their with /warp dock.

Another quick way to earn money is by participating in the /weeklychallenge (or /wc). Each week, there is a new challenge that the entire server needs to participate to complete. If we complete the challenge, then anyone who participates (not even wins, just participates!) gets $10K! The challenges end at 12PM ET. 1st, 2nd, 3rd place winners get big cash prizes as well as additional rewards!

We do not have /baltop (list of the richest people on the server) because we're a chill server that doesn't want the pressure of that kind of competition.

You can pay others by doing /pay playername $amount$

You can turn your pay on and off by doing /paytoggle or /payon or /payoff
