Equip things?

join messages, name gradients, name color, chat colors, glows, tags, pins, wings... and more?

Use these commands to equip things:

Command	Details
/joinmessage	Opens the join message gui window from which you can pick the message you want to equip (as long as it's unlocked)
/gradients	Opens the nickname window: use the right side book to change your name gradient
//nickname *or* /nickcolor	Opens the nickname window: this will let you change the gradient and your nickname if you are a warlock rank or higher.
/prefix #hexcolor:#hexcolor	Dragon ranks can set the prefix color of [??????] by using this command with the hex colors behind it. You can add up to 6 colors.
/chatcolor	Opens the chat color window: find the color you want to use to equip it
/eglow	Opens the glow window to select the color you want
/pins	Opens the window to select a little graphic that appears next to your name in chat and the tab screen (/pins unequip)
/wings *or* /backbling	Hold the wings in your hand and then do the command. Press F5 to change the view and see them on!
/hat	hats or putting items on your head

Join Message

A join message announces you when you first log in.

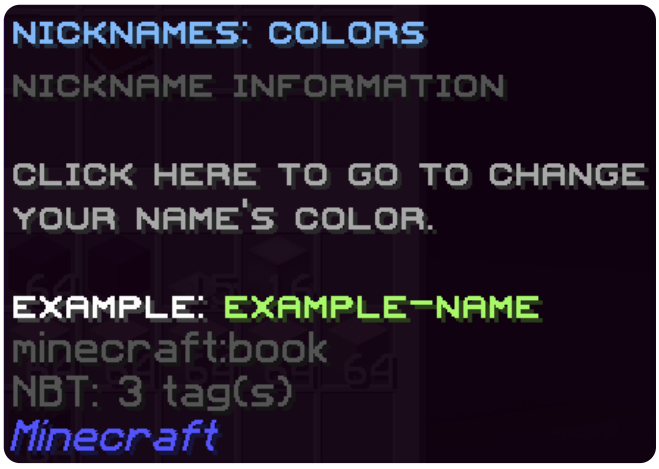

Use /joinmessage to open the window. Click on the left block or right block to select the join message category (and join message) you want to equip. Make sure it's unlocked! Additional pages of messages can be accessed by clicking on the white arrow.

To remove a join message, click the white [?] button at the bottom of the main /joinmessage screen.

Name Gradients and Colors

Change your name color in chat by doing /nick or /nickname or /nickgradient or /gradient.

If you are a Dragon rank, you can also customize your prefix title [??????] as well. Do this by using /prefix #hexcode:#hexcode:#hexcode:#hexcode:#hexcode:#hexcode (up to six colors). Select your hex codes from any hex code color picker, like Birdflop RGB.

Chat Colors

In the Mineseed chat, you can customize your chat color once you unlock from many choices! Type the command /chatcolor to open the menu. Pick from a variety, or create your own in the Mineseed store. Other colors can be won through crates (including the daily rewards crate).

Glows

Glows make your avatar have a color around your skin. They are equipped from /eglow. Select solid colors from the main menu, or click the enchanted book and select special glows. You can make glows blink or stay solid.

Tags

Tags appear after your username. In this example, estherium's tag is [????????]. You can equip unlocked tags by doing /tags. You can win custom tags by winning build competitions.

Other tags can be won through crates, the soul shop, the token shop, and more.

Pins

Pins are small icons that can appear after your username in chat and in the tab screen (for java users). You can equip a pin by doing /pins and selecting an unlocked one in the menu. You can win custom pins by winning build competitions, or purchasing them from the Mineseed store. Other pins can be won through crates, the soul shop, the token shop, and more.

Wings

Wings, or back bling are just that--a cosmetics that you can put on your back. Hold the wings in your active hand, and do /wings or /backbling to put them on and off.

You can get wings from the goodies crate, monthly crates, and the /store. Occasionally, people will also sell them on /ah, especially after monthly crates come out.

Examples of some wings in the game.
