? Mobdex

/mobdex | /encyclopedia

The mobdex is a fun, pokedex-like collection game. In the wild, you may encounter mobs that are sparkling with blue, green, purple, or orange particles. They will also have a nametag saying they are ‘rare,‘ 'unique’, ’legendary,’ or ‘mythical’. To register these mobs into your mobdex, you must kill them. You can then do /mobdex to view the ones you have collected so far.

Unlike normal fish and axolotl, Mobdex fish and axolotls are not able to be bucketed.

Collect them all!
