Use and Access my Player Vaults

/pv # | /vault #

Player vaults are additional storage that are available wherever you go, similar to your inventory.

Each player vault is the same size as a double chest (54 inventory spots). You can put anything in them that you can normally put in your inventory.

To access them, simply type /pv # or /vault #, where the # is which player vault you want to access. Premium ranks have anywhere between 1 and 12 player vaults.
